### Education

#### Universidad Privada Boliviana (UPB)

B.S. in Computer Systems Engineering (Cum Laude) GPA: 90.50

La Paz, Bolivia

2021 – 2025

#### Video Game Design and Production: From Zero to Professional

Instructors: Carlos Coronado, Eric Rodriguez Ramos

Udemy

March 2026 – May 2026

#### AI Development Fundamentals Certification

March – 2026

#### Course: iOS & Swift 5.7 – Complete Course from Zero to Professional

Instructors: Juan Villalvazo, Brais Moure

Udemy

December - 2025

#### TOEFL iBT: 73 (Level B2)

December - 2022

#### Scrum Foundation Professional Certificate (SFPC v2020)

August – 2022

#### Course: Create Your First 3D Game with Unity

March – 2023

#### Course: Learn C# by Creating a Video Game from Scratch with Unity

March – 2023

#### Course: Create a Multiplayer FPS Shooter with Unity and Photon PUN

April – 2023

#### High School: Colegio Dr. Martín Cárdenas

Honors in Technological Research

GPA: 91.37

La Paz, Bolivia

December - 2020

### Experience

#### Fractal Consulting

##### Software Developer

Remote (Perú)

August 2025 – Present

- Designing and implementing a liveness detection system with object detection, integrating computer vision techniques in Python for identity verification.
- Developing and maintaining **Spiralia**, the company's employee management web platform built in C#, focusing on performance optimization and feature expansion.
- Developed a **RAG (Retrieval-Augmented Generation)** system using **React** and **Python** to orchestrate multiple **LLMs** for automated querying of company knowledge bases.
- **Customer Support Automation:** Engineered an **n8n** workflow integrating **WhatsApp**, **TimelinesAI** and **AI** to provide automated, context-aware responses based on company knowledge bases.
- Implementing a **facial recognition system** on Raspberry Pi, displaying registered users on a web interface, utilizing React, .NET, Java, C, and AWS Rekognition.
- Collaborating with cross-functional teams to align technical solutions with client requirements.

**Empacar S.A.**  
**Technology Intern**

La Paz, Bolivia  
March 2025 – April 2025

- Configuration and maintenance of computer equipment and email accounts.
- IP assignment and configuration of MikroTik routers.
- Developed a printer monitoring system in Python with a React interface.
- Automated support ticket handling using GLPI and ODBC connection with MySQL and Informix.

**AI Access Control System with Facial Recognition – Thesis Project**  
**Fullstack Developer | Grade: 95/100 (Academic Excellence)**

La Paz, Bolivia  
Feb 2025 – Nov 2025

- **End-to-End Development:** Designed and deployed a full-stack security solution for **Instituto Tecnológico Transmite** in La Paz, automating facility access control for students and staff.
- **Facial Recognition Engine:** Integrated **face-api.js** to implement real-time biometric identification, ensuring high accuracy and secure authentication at the edge.
- **Backend & Database:** Architected a robust RESTful API using **Node.js** and **Express**, with a **MySQL** database hosted on **AWS** for reliable data persistence and scalability.
- **Cloud Deployment:** Managed a CI/CD-oriented deployment, hosting the frontend and backend on **Vercel** and leveraging **AWS** for cloud infrastructure.
- **Quality Assurance:** Achieved high software reliability by implementing **Unit Tests** and **Integration Tests** using the **Mocha** framework, ensuring the system met strict security standards.
- **Frontend Interface:** Developed a responsive and intuitive dashboard in **React** for administrators to manage user permissions and monitor access logs in real-time.

**UPB-Forces**  
**DevOps Development Assistant**

La Paz, Bolivia  
April 2024 – July 2024

- Developed a functional Discord bot for internal management.
- Implemented CI tools like Docker and Jenkins.
- Solved technical issues related to repositories and task automation.

**UPB-GO – Augmented Reality**  
**Augmented Reality Unity Developer**

La Paz, Bolivia  
August 2023 – December 2024

- **AR Implementation:** Architected a mobile "Treasure Hunt" experience using **Unity** and **Vuforia Engine**, leveraging image targets and spatial tracking for immersive gameplay.
- **Game Systems & Logic:** Developed the complete core gameplay loop in **C#**, including interactive objectives, clue-solving mechanics, and real-time state management.
- **Backend Integration:** Integrated **Firebase Realtime Database** to synchronize player progress, leaderboards, and live game events across multiple devices.
- **Admin Tools:** Built a dedicated web-based dashboard in **React** for organizers to monitor player activity and manage treasure hunt locations in real-time.
- **Performance Optimization:** Refined AR rendering and asset management to ensure a stable 60 FPS experience on mobile devices.

**Concert Ticketing App - Personal Project**  
**Mobile Developer**

La Paz, Bolivia  
July 2024

- Developed a mobile app using React Native with Expo CLI.
- Simulated ticket purchase and management.
- Designed the event browsing interface and user profile.

**My Last Story – Survival Multiplayer FPS (Personal Project)** [[Link to Drive](#)]  
**Unity Developer**

La Paz, Bolivia  
March 2023 – August 2023

- **Multiplayer Architecture:** Implemented real-time multiplayer synchronization using **Photon PUN 2**, managing player states, room logic, and networked object pooling.
- **Gameplay Systems:** Developed a scalable **Round/Wave system** and AI zombie spawning logic, increasing difficulty dynamically based on player progress.
- **Economy & Shop Logic:** Engineered an in-game currency system where players earn points per kill to purchase ammo and health refills from interactive world triggers (Shop/Vending system).
- **Combat & Mechanics:** Programmed FPS core mechanics, including weapon handling, raycast-based shooting, and health/damage systems for both players and NPCs.
- **Asset Integration:** Managed 3D environment assembly and UI integration within Unity, ensuring a cohesive survival experience in a tropical setting.

**Leadership And Activities**

**Bolivian Taekwondo Federation (WT)**  
**Competitor and Assistant Coach**

Bolivia  
2012 - 2020

- **Pan American Champion (2-time)** and **8-time National Champion** in youth and adult categories.
- **14-time State (Departmental) Champion**, demonstrating long-term consistency and elite-level performance.
- **1st Dan Black Belt**; mentored teammates and served as an assistant instructor.
- Disciplined focus on physical development and advanced competitive techniques.

**Kickboxing (WAKO) and Brazilian Jiu Jitsu Practitioner**  
**Amateur Athlete**

Bolivia  
2024 - Present

- Yellow belt in Kickboxing and regular practitioner of Jiu Jitsu.
- Disciplined focus on physical development, self-defense, and mixed techniques.

**Skills And Interests**

**Technical:**

- **Programming Languages:** Java, Kotlin, C++, C#, Python, JavaScript, Swift, HTML/CSS, T-SQL.
- **Frameworks & Libraries:** React, Angular, Vue.js, React Native.
- **Databases:** MySQL, MongoDB, PostgreSQL, T-SQL.
- **Automation & RPA:** ElectroNeek Studio Pro, n8n, Workflow Automation, RPA Development.
- **AI & Emerging Tech:** Retrieval-Augmented Generation (RAG), LLM Orchestration (Multi-model), Computer Vision.
- **Tools:** GitHub, Docker, n8n, Postman, Trello, VMWare, Figma, GLPI, Visual Studio Code.
- **Cloud Platforms:** AWS, Google Cloud.
- **Game Development:** Unity, Godot Engine.

**Languages:**

- Spanish (native)
- English (Upper Intermediate- TOEFL iBT: 73, B2)

**Citizenship:** Dual Nationality (Bolivian & Spanish); Valid EU Passport.

**Interests:** Video game development, artificial intelligence, emerging technologies, process automation.
